

This guide is an effective reference and teaching resource, providing access to comprehensive information on all Apprenticeships available across England.

The guide is a very comprehensive resource and has given me a clearer idea of routes for pupils interested in Apprenticeships, backed up with relevant information.

School Work Experience Co-ordinator

The Teachers Guide to Apprenticeships is an extremely easy to use resource pack for all teachers, stakeholders and other information, advice and guidance professionals. The guide provides details of the application processes, entry

requirements, qualification structures and levels and progression routes for all Apprenticeship Frameworks in all sectors. Everything you need to know about Apprenticeships.

“A radical change is needed in the way careers advice and education is delivered. This strategy aims to do just that with schools and parents at the centre. Many people have anecdotal experiences of really bad careers advice and often say if they had their chance again they would have done something different. I want this generation of young people to be able to look back and say their careers advice and guidance was relevant and gave them informed options”.

Ed Balls, Secretary of State for Children, Schools and Families.

Quality, Choice and Aspiration strategy 26 October 2009.

The Teachers Guide to Apprenticeships is designed to enable teachers, and other information, advice and guidance professionals, young people and parents to develop knowledge an understanding of Apprenticeships including the frameworks and progression routes.

Occupational Sectors – the Guide covers the following sectors: Agriculture, Horticulture & Animal Care; Arts, Media & Publishing; Business, Administration & Law; Construction, Planning & the Built Environment; Education & Training; Engineering & Manufacturing Technologies; Health, Public Services & Care; Information & Communications Technology; Leisure, Travel & Tourism; Retail & Commercial Enterprise

Each Occupational Sector begins with an overview including information on how the industries within that sector work. Each sector is colour coded for easy reference.

Within each sector section are the individual frameworks which contain information on that Apprenticeship and the type of work available and skills required. This includes entry requirements, subjects studied, NVQ's, technical certificates, labour market information, how to apply and useful links and progression routes.

Apprenticeships and Advanced Apprenticeships are both covered.

The Guide comes in its own binder and includes a CD, enabling individual pages to be copied for future reference by teachers, IAG professionals, young people, parents and carers.

Teachers need a single source document that explains the Apprenticeship frameworks. Something that is easy to use whilst not costing a fortune. This Guide ticks all those boxes.

The guide is extremely useful during careers guidance sessions.
School Careers Co-ordinator

Benefits to Young people

- Contributes to the development of their process skills enabling them to apply this information for real life decisions
- It provides comprehensive information on all Apprenticeships in England allowing them to make informed choices
- Achieve economic well-being and engage in training and further education.

Benefit to Schools

- Provides a comprehensive guide to information on Apprenticeships
- Contributes to successful OFSTED Inspections and quality of delivery of information, advice and guidance in schools
- Meets the requirements of the Apprenticeships, Skills, Children and Learning Act 2009
- Removes the need for schools and LEA's to develop, research and produce their own materials.
